Support & Web Team

Security Reminder: Remember to follow good security practices and actively scan for viruses and spyware. A SmartCash user lost 9 Million SMART because of spyware on their computer that recorded their password to steal their funds. Protect yourself by running active antivirus, using a dedicated computer for cryptocurrency wallets, and using the on-screen keyboard to enter passwords. And remember, never share your private key or wallet.dat file and keep it encrypted with a strong password. We encourage everyone to assess their security (and backup) practices and improve them.

Changelly is integrated with the [SmartCash Web Wallet](#) to make it easy to exchange SmartCash.

You can now easily convert dozen different [coins and tokens into SmartCash](#) from inside your Coinomi wallet using Changelly in the exchange tab.

SmartCash is now live on the [Braziliex exchange](#) with USDT, BTC, and BRL trading pairs.

Dual-miners must use port 3333 and [update to the latest v11.9 version of Claymore](#) for Keccak shares to be accepted on the [official mining](#)

pools.

There are still 2,000 SmartNodes that have not updated from v1.1.1 and are not receiving block rewards. Be sure to update to at least v1.2.3. Instructions are here.
