

How to activate SmartCash rewards in a mobile wallet? (using Coinomi)

This guide will briefly show you how to quickly activate rewards in Coinomi mobile wallet. The process is basically the same in other wallets (Edge, Pungo, Atomic, Electrum).

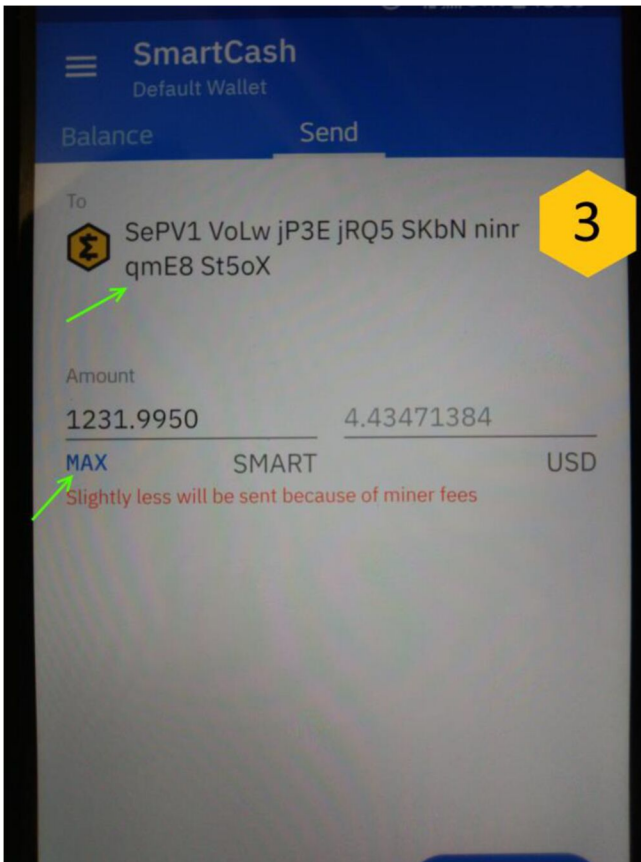

Step 1: Select SmartCash in your mobile wallet (e.g. Coinomi)

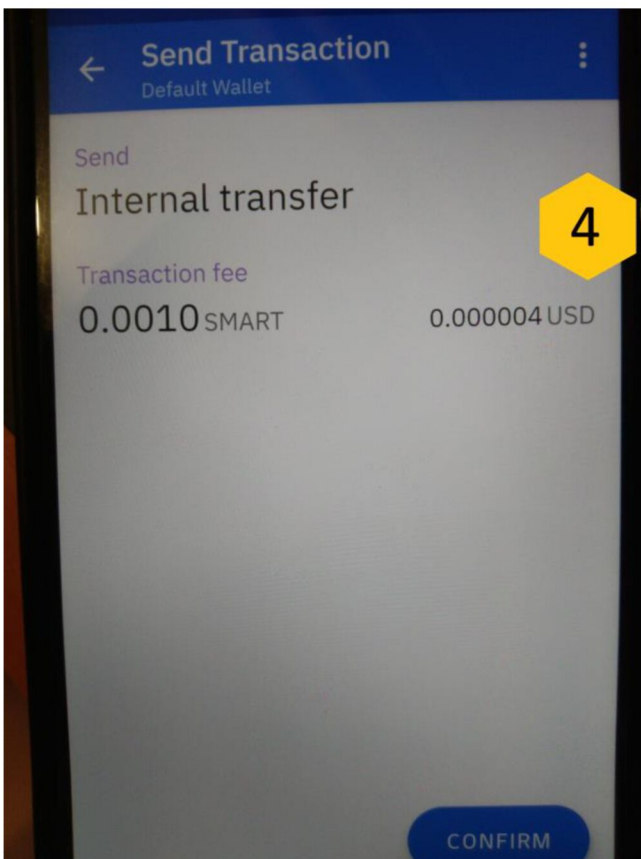

Step 2: Go to the "Receive" tab and copy the address

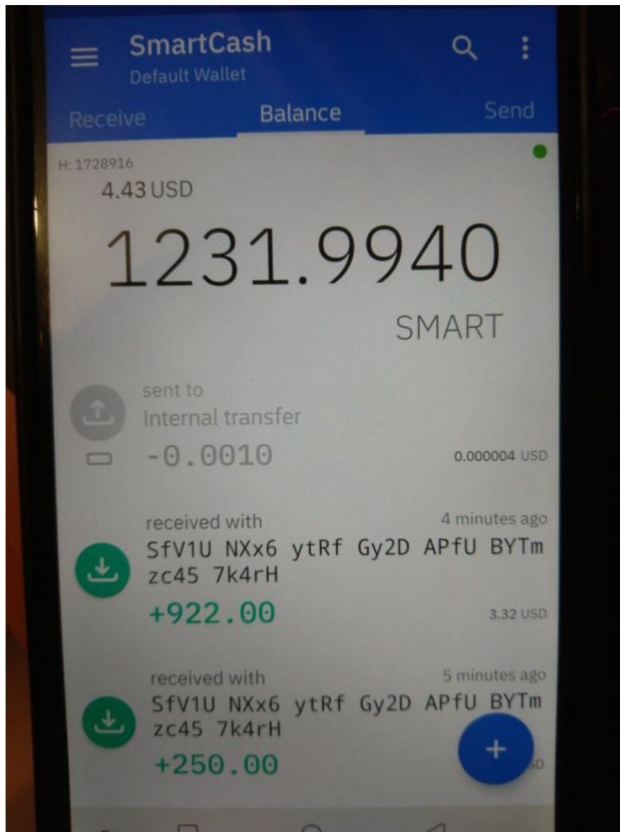

Step 3: Open the “Send” tab and paste this address. Click on “MAX” to send the entire amount to your address.

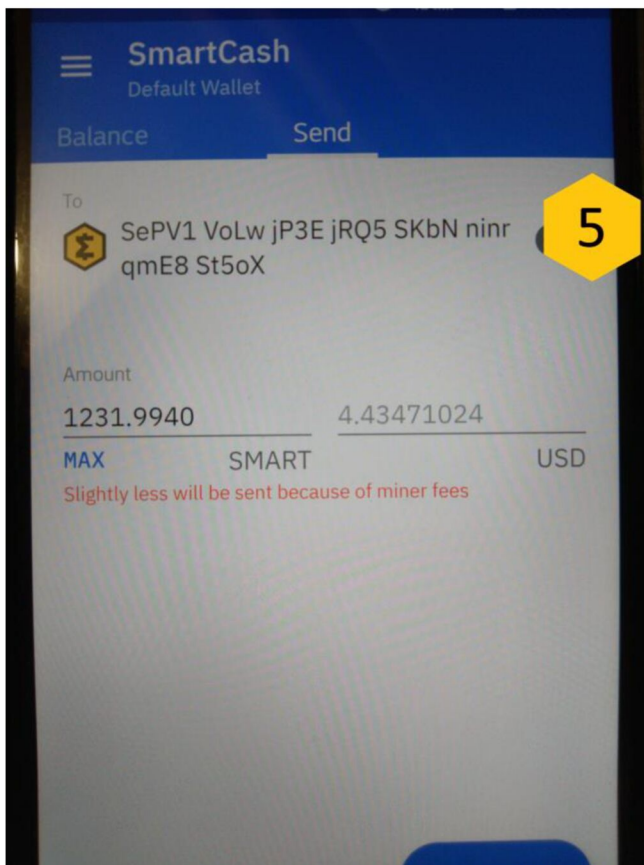

Step 4: Click the “Confirm” button and confirm the transaction by entering your password.

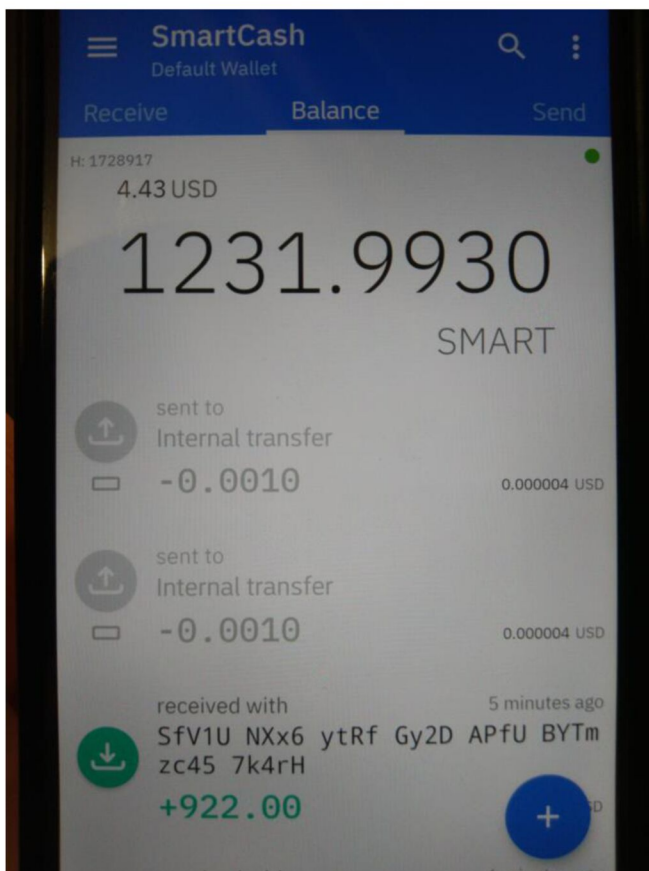

The last transaction appeared in the list of transactions.

Step 5: Open the “Send” tab again and paste the same address from the clipboard. Click on “MAX” and again send the entire amount to this address. Confirm the transaction with a password.

You can also check the address in the block explorer and see two transactions on the address. This means that the address is now activated and you can receive rewards.

Done!

At the end of this guide will be added a link to the FAQ, where you can find answers about what is SmartRewards / SuperRewards, what is the minimum amount at the address to receive rewards, etc.
