Development & Quality Assurance Teams

The SmartCash Performance Testing (Stress Testing) has reached new levels: SmartCash can do 100 tx/s sustained, 117 tx/s 5 min averages, and 380 tx/sec peak now all using on-chain transactions. You can also explore the mempool statistics at the interactive visual charts at the [SmartStats SmartCash Transactions](#) page.

Development on SmartCash version 1.3 has progressed to the testing/testnet phase, and will introduce cold voting keys that will be integrated into the proposal system. This will enable secure and simplified methods for [Improved SmartRewards](#). The estimated timeframe to switch to the v1.3 criteria are around January 25th or February 25th, with the final date to be determined once testing is completed.

The testing and quality assurance process for the new Bitcoin Confidential wallet is underway, with an [estimated release of Q1 2019](#).

The latest SmartCash Electrum release is getting close! You can see the regular [activity on this GitHub](#).

The Edge Wallet APK which includes SmartCash support is being tested, and should be included in the next [Edge Wallet](#) release.
