<https://twitter.com/btconfidential/status/1070835133962510336>

Remember, “Not doing any other airdrops. So SmartCash (SMART) will be the only airdrop recipient and will form the initial distribution.”.

## **Discord and Telegram Links for Bitcoin Confidential**

Discord: <https://discord.gg/bwZqdGn> for chat.

Telegram: <https://t.me/bitcoinconfidential> Telegram is for news/alerts only. No chat, use Discord for that.

## **Initial and Max Supply**

“There are about 750 million eligible smart to airdrop. 7.5 Billion Bitcoin Confidential for the drop is estimated. Then inflation will add some to final amount. But tbd until we get final snapshot.”

## **How to Access your SmartCash Private Keys—Links to the Wallet Guides**

REMEMBER SECURITY!!

Private keys give you access to funds stored on your public address. That’s why it’s important to keep them in a secure place where no unauthorized person can access them.

Never show your mnemonic seed to anyone and keep it in a safe place! If someone finds out your mnemonic, he will be able to access all your addresses and funds.
