

How to activate SmartRetire

SmartRetire are rewards for holders who have a long vision for the project and in return will be able to receive the highest reward level.

The minimum amount to qualify is **1 million Smart** and the locking period is **15 years**. 1 million or more Smart must be in 1 transaction.

Similar to TermRewards, SmartRetire deposits can only be spent after the expiration date. The yearly yield of SmartRetire is 50% and paid quarterly. The rewards earned can be spent or reinvested in a different SmartRewards activated address.

Note: SmartRetire yields may change based on participation rate. Existing SmartRetire rates will stay the same if there is a yield change.

1. Download and install [SmartCash Node Client](#).

- Buy **SmartCash** using [exchanges](#) and send coins to an address in your wallet. To activate **SmartRetire** you need at least 1 million SMART.
- Open the **"Send"** tab. In the **"Pay To"** field paste address that you want to activate.
- Enter the amount - 1 mil SMART and more or just click **«Use Available Balance»**.

- At the bottom of the wallet, you will see a field labeled **"LockTime or TermRewards"**, click on it and select **"15 Year SmartRetire & 1MM+"** via the drop-down menu.

***Be careful:** after sending this type of transaction, your funds will not be available for spending during the selected period! You will be able to move rewards to a different address and spend them.*

- Click the **«Send»** button and confirm the transaction by entering your password.
Done!

7. After sending the transaction and receiving confirmation in the network, you will see the activated address in the **“TermRewards” tab** where you can see the balance of your address, term, yearly yield and expiration date.
